EDUCATION

Computer Science

Faculty of Computer & Artificial Intelligence
Cairo University

10/2020 - 07/2024

Giza

Courses

- Fresh Graduate

PERSONAL PROJECTS

Parking Garage software system using java

- I Developed a comprehensive parking garage management system that efficiently manages the parking space and enhances the overall experience for drivers. The system utilizes two main methods, first-fit, and best-fit, to allocate parking slots based on the size and number of cars.

Student affairs Website (front & back-end)

- Student affairs Website (front & back-end) I Developed a dynamic and user-friendly website for student affairs that streamlines administrative tasks and enhances communication between students and faculty. The website consists of two main sections, one for the admin and the other for the students, with different roles and permissions. JavaScript (front-end) , Django(back-end)

Library system (Data Base)

- Developed a database system for an online library system service that allows customers to rent and return books from a large catalog of titles. The system provides a user-friendly interface that enables customers to search for books, check availability , and reserve them for a specified period. MySQL (Data base) , C# (GUI)

wedding planner(Management and web project)

- Developed a website for a weddings planner that showcases their decoration and services , and includes a comprehensive business plan document. Demonstrates skills in web development , business planning , and market research.

Shopping Card Using .Net

- I have done it in ITI course it is simple program to add or delete or create item and show it for users and admins and just admins can edit this information

Tradex Website

- this website is final project in NTI using Bootstrap and Javascript

Connect 4 Game

- game with python i used minimax and alpha pita pruning algorithms and Gui

SKILLS

C++ , C , C# ,python , java Programming language

Software Development

Web Development front-end By
HTML,CSS,JavaScript,Bootstrap , .Net with MVC

Communication Skills

Database management

Problem-solving Data Structures/Algorithms OOP

CERTIFICATES

Problem Solving Course (c++ Programming Language)

.NET From ITI

Web Design From NTI

React Basics From Coursera

LANGUAGES

English

Professional Working Proficiency

Frensh

Limited Working Proficiency

INTERESTS

Back End using .Net

web Design
